Chapter 1. Sum Up

How to Sum Up Numbers?

Here you will find instructions about using the addition feature of JPS Calculator App

To successfully sum up numbers, you must know what is addition.

1. Enter the first number
2. Choose the plus (+) button
3. Enter the second button
4. Choose the equal (=) button

The result from the addition is displayed.

You want to add 2 from 3. The equation will look like $2+3=5$. You enter 2. Press add. Enter 3. Press equals.

The result 5 will appear on the screen.

Chapter 2. Subtract

What is subtraction of numbers?

To successfully perform the task of subtracting numbers, you must know what subtraction is.

“Subtraction is a mathematical operation; it is a process or action that you do with numbers. Subtraction allows you to find the difference of 2 numbers. You use the minus (-) button to express the subtraction operation in the app. In the subtraction process, we take a number and reduce it to a smaller number. That is, we take away one number from another”.

How to Subtract Numbers?

Here you will find instructions about using the subtraction feature of JPS Calculator App

To successfully subtract numbers, you must know what is subtraction.

1. Enter the first number
2. Choose the minus (-) button.
3. Enter the second number.
4. Choose the equal (=) button.

The result from the subtraction is displayed.

You want to subtract 2 from 3. The equation will look like $3-2=1$. You enter 3. Press minus. Enter 2. Press equals.

The result 1 will appear on the screen.

Chapter 3. Multiply

How to Multiply Numbers?

Here you will find instructions about using the multiplication feature of JPS Calculator App

To successfully subtract numbers, you must know what is multiplicaton.

1. Enter the first number
2. Choose the multiply (*) button
3. Enter the second number
4. Choose the equal (=) button

The result from the multiplication is displayed.

You want to multiply 2 and 3. The equation will look like $2*3=6$. You enter 2. Press multiply. Enter 3. Press equals.

The result 6 will appear on the screen.

Chapter 4. Divide

How to Divide Numbers?

Here you will find instructions about using the division feature of JPS Calculator App

To successfully subtract numbers, you must know what is division.

1. Enter the first number
2. Choose the divide (/) button
3. Enter the second button
4. Choose the equal (=) button

The result from the division is displayed.

You want to divide 6 from 3. The equation will look like $6/3=2$. You enter 6. Press divide. Enter 3. Press equals.

The result 2 will appear on the screen.
